StCatsHacks.org | hosted by **cs@stcats** | hack@stcatherines.gr

About

StCatsHacks is a student hackathon, run by CS students at St. Catherine's British School. On 2nd and 3rd December 2023, around 150 makers and hackers will join us for two days of hard work and loads of fun.

Scope

StCatsHacks 2023 is the sixth edition of the inter-school hackathon held in Greece. Computer Science lower-school and high-school students will convene at St. Catherine's British School for two days hack programming competition. In teams of 4/5, with access to APIs and the guidance of dedicated mentors, students are called to create innovative computer programs which will be evaluated on their functionality and applicability in the real world. This year's theme is the UN 14 Development Goals. Participants are encouraged to develop solutions that tackle various challenges, including marine pollution, overfishing, friendly shipping, climate change impacts, sustainable aquaculture, ocean conservation, and more, but any idea of your own could be apt. Food will be available for all participants and winners will be receiving awesome prizes. We look forward to seeing you all on December 2nd.

Who we are

We are computer science students from St. Catherine's British School hoping to organize an inter-school hackathon that will incentivize students to put their innovative skills to the test. The competitive nature of the hackathon allows for rigorous and collaborative thinking. We hope to create an annual hackathon for high-school students to showcase their skills in the field of STEM.

Where

- St. Catherine's British School's Main Hall

When

December the 2nd, starting at 12:00. Students will be able to register via our website until 1 day before the event.

Who

We expect 150 lower and high-school students.

Why we want you

We would like you to be a part of StCatsHacks because we know that you will add value and help us organize an awesome event.

How you can get involved

- cover venue expenses

- cover expenses in wish list

- offer internships to winners

- send mentor(s) and/or judges

- provide exclusive access to courses

How you will benefit

- **Gain Student Awareness**: thanked at kickoff & award, logos on online & print material, company banner

- **Run workshops & Tutorials**: Catch students' eyes with your groundbreaking technology

Prizes

- Gift- Cards

- Internship

- Exclusive access to courses

- Mentoring

Wish list

- Snacks & Drinks

- Shirts

- Badges

- Coffee
